

## Emergency Lighting Battery NiCd

Emergency light batteries are a critical part of emergency lighting fixtures, and its function can save many lives. It is therefore crucial that the correct type of battery pack is used.

Remember that the emergency lighting batteries must be tested every month, and fully discharged once a year. It must be tested that it can light up for at least one hour.

It is important to make the caretakers aware of this rule.

Part number: 510002

Product name	GNBB38AD0506 BST 3.6V 2.2Ah NiCd
EL-Number	6644862
Nominal Voltage	3,6V
Capacity	2,2Ah
Weight	230 gr
Contact	No
Wire	No
Chemistry	NiCd
LxWxH	99x33x35 mm
